MAN Energy Solutions provides 53 MW of electrical power to Iraq

Six MAN engines are supplying power to a drink can factory in Baghdad

MAN Energy Solutions is providing a drink can factory of the Royal Can Making Company (RCMC) in Iraq with six MAN 18V32/40 CD engines, with a total capacity of 53 megawatts (MW). The recently constructed power plant in Baghdad, the capital of Iraq, will supply power to the RCMC manufacturing site and also to other nearby industrial plants.

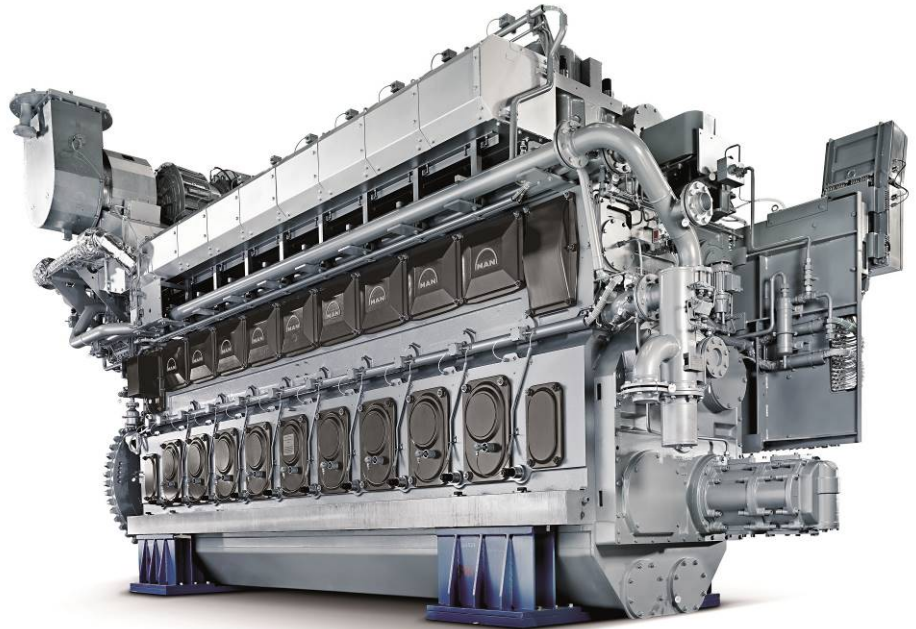

“Iraq is a country in the process of change. After the armed conflicts of the past, the World Bank is forecasting economic growth of 6.5% for this year,” explained Waldemar Wiesner, Head of Region MEA (Middle-East Africa), Power Plant Sales, at MAN Energy Solutions. “Providing local businesses with a reliable energy supply is the prerequisite for economic growth in Iraq. Our localized power plant solutions ensure the operation of industrial plants and make customers, such as the Royal Can Making Company, independent of the national power grid,” Wiesner added.

The new power plant guarantees a reliable energy supply for the RCMC drink can factory and therefore enables high utilization of production capacities, as the plant is no longer affected by fluctuations in the national grid. The company manufactures more than two billion drink cans every year.

Increased presence in the Persian Gulf

This year, MAN Energy Solutions has already commissioned two power plants in the Iraqi cities of Samawah and Basra.

“We are proud that the Royal Can Making Company is another customer from the Persian Gulf region which is relying on energy solutions provided by MAN Energy Solutions. In total, we are now supplying more than 200 MW of power to rebuild the country's infrastructure,” said Wiesner.

MAN Energy Solutions ensures the energy supply of a drink can factory in Iraq with six MAN 18V32/40 CD engines.

MAN Energy Solutions enables its customers to achieve sustainable value creation in the transition towards a carbon neutral future. Addressing tomorrow's challenges within the marine, energy and industrial sectors, we improve efficiency and performance at a systemic level. Leading the way in advanced engineering for more than 250 years, we provide a unique portfolio of technologies. Headquartered in Germany, MAN Energy Solutions employs some 14,000 people at over 120 sites globally. Our after-sales brand, MAN PrimeServ, offers a vast network of service centres to our customers all over the world.
